

InSync™ M

SAFLOK™ has designed and manufactured powerful solutions that help building managers achieve increased access management flexibility, security, and efficiency in their daily operations. SAFLOK products are the trusted name in multihousing communities, student housing and campuses, commercial buildings, as well as transient and long-term military housing.

The InSync™ series is the latest lock line. The series features a complete range of versatile locks that communicate by means of a wireless RFID (radio frequency identification) platform. The front desk operating system for the locks is the Windows-based SAM RF software. This software programs information, such as access codes, onto the RFID key.

Within the series, InSync M offers property managers an elegantly styled security option that optimizes resident safety. InSync M is a full mortise lock embodied in a sleek and gently contoured metal housing.

Security Access Manager

InSync M lock can be provided in two different configurations to accommodate various applications.

InSync M Unit Locks

The unit configuration provides the locks with true residential entry lock functionality. Each time the inside lever is rotated, the lock goes into an unlocked condition eliminating the possibility of lock outs. When the key is inserted into the lock after egress, the lock is placed back into a locked position. Insertion of the key and rotation of the outside lever allows ingress and always places the lock back into the unlocked position. The inside thumb-turn, when turned, will toggle the lock back from unlocked to locked. Unit locks are programmed with one resident code (change key). Each key made with one resident code can have up to 64 unique identity codes.

InSync M Suite Locks

The suite configuration allows access to multiple residents who have the need to access individual unit doors behind the suite door. Suite locks have no thumb-turn and always remain in a locked position after ingress or egress. Suite locks can recognize up to 20 resident codes.

InSync™ M Specifications

- 8" mortise lock
- 1" automatic dead bolt (ADB™)
- 3/4" dead-locking latch
- Standard 2-3/4" (70 mm) backset

- Interior thumb-turn (unit only)
- Standard ANSI mortise lock door prep
- Uses 4 AA batteries
- Certified by Underwriters Laboratories (UL) for use on fire doors up to a 20-minute or three-hour rating

Handle Styles *(Vintage, Gala, and Arc levers may not be code compliant in all areas. Check local fire code. Actual finish color may differ from printed example.)*

Finishes

(Check for availability.)*

Satin Chrome, Satin Brass, Bright Chrome, Bright Brass, *Dark Mahogany, & *Satin Nickel.
