In-Room Safes

Secure Storage

Solid Security and User-Friendly Operation

In today's wired world, people carry a wide array of expensive electronic devices, and they want a safe and secure place to store them when away from home. ILCO has the solution with a complete line of in-room safes that combine impeccable construction, security, and user-friendly operation. These safes are ideal for hotels, resorts, apartments, student housing, offices, and more.

210-D

211-CD

212-D

Programmable Personal Code Entry

- Guests choose their own personal four, five, or six-digit code to lock/unlock the safe.

Illuminated Keypad

- Makes it easy to read the numbers if safes are installed in closets.

Audit Trail - Two Options Available

- The digital keypad can be prompted to report the last 12 entries.
- An Electronic Control Unit (ECU) lets you print 100 entries, showing who used the safe and in which room.

Code Blocking

- Built into the keypad, it provides an additional safety measure against unauthorized use. If someone tries to open the safe with an invalid pass code, the system will shut down for 15 minutes.

Battery Override Unit

- Allows access to the safe if the guest forgets the pass code or if a battery failure occurs, so no valuables are ever trapped inside the safe.

Electronic Master Key (Protected Master Code)

- Managers and security personnel each have a separate master code that allows them to unlock the safe.

One-Touch Battery Audit

- Instantly obtain battery conditions by touching the # key on the digital keypad.

Quick-Access Battery Panel

- Batteries are housed in a special slide panel inside the door for easy access. There is no need to remove the entire door cover to access the batteries.

Handheld Programmer

- An easy-to-use handheld unit serves as a programmer and password-protected ECU for all safes. It can be used to obtain an access audit trail and as an emergency unit to unlock the safe, if necessary.

Optional Features

All models are available in the following configurations:

Mechanical Key Operation Only

- Uses the state-of-the-art Medeco key and cylinder locking system.

Electronic Keypad Only

- Provides guests with digital access for locking and unlocking the safe. A guest chooses his/her own personal four-, five-, or six-digit code, enters it on the keypad, shuts the door, and presses the close button for secure locking.

Electronic Keypad with Credit Card

Swipe

- Instead of remembering numbers, guests may use their credit card or any type of magnetic stripe to lock/unlock the safe.

Electronic Keypad with Credit Card

Swipe and Mechanical Key Override

- In case of emergency, a master key can be used to unlock the safe. All electronic safes come with an electronic override.

Mounting Pedestal

- Available with all models.

Pedestal	Height inches/mm	Weight lbs./kg
Pedestal I	13½" 343	3½ 1½
Pedestal II	9" 229	3 1
